

Transportation Electrification Infrastructure Needs Analysis

Charger density heat maps:
*Disadvantaged Communities (additional):
DC Fast Charger*

Disadvantaged Communities (additional):

DC Fast Charger

Business as usual

2020 - 2035

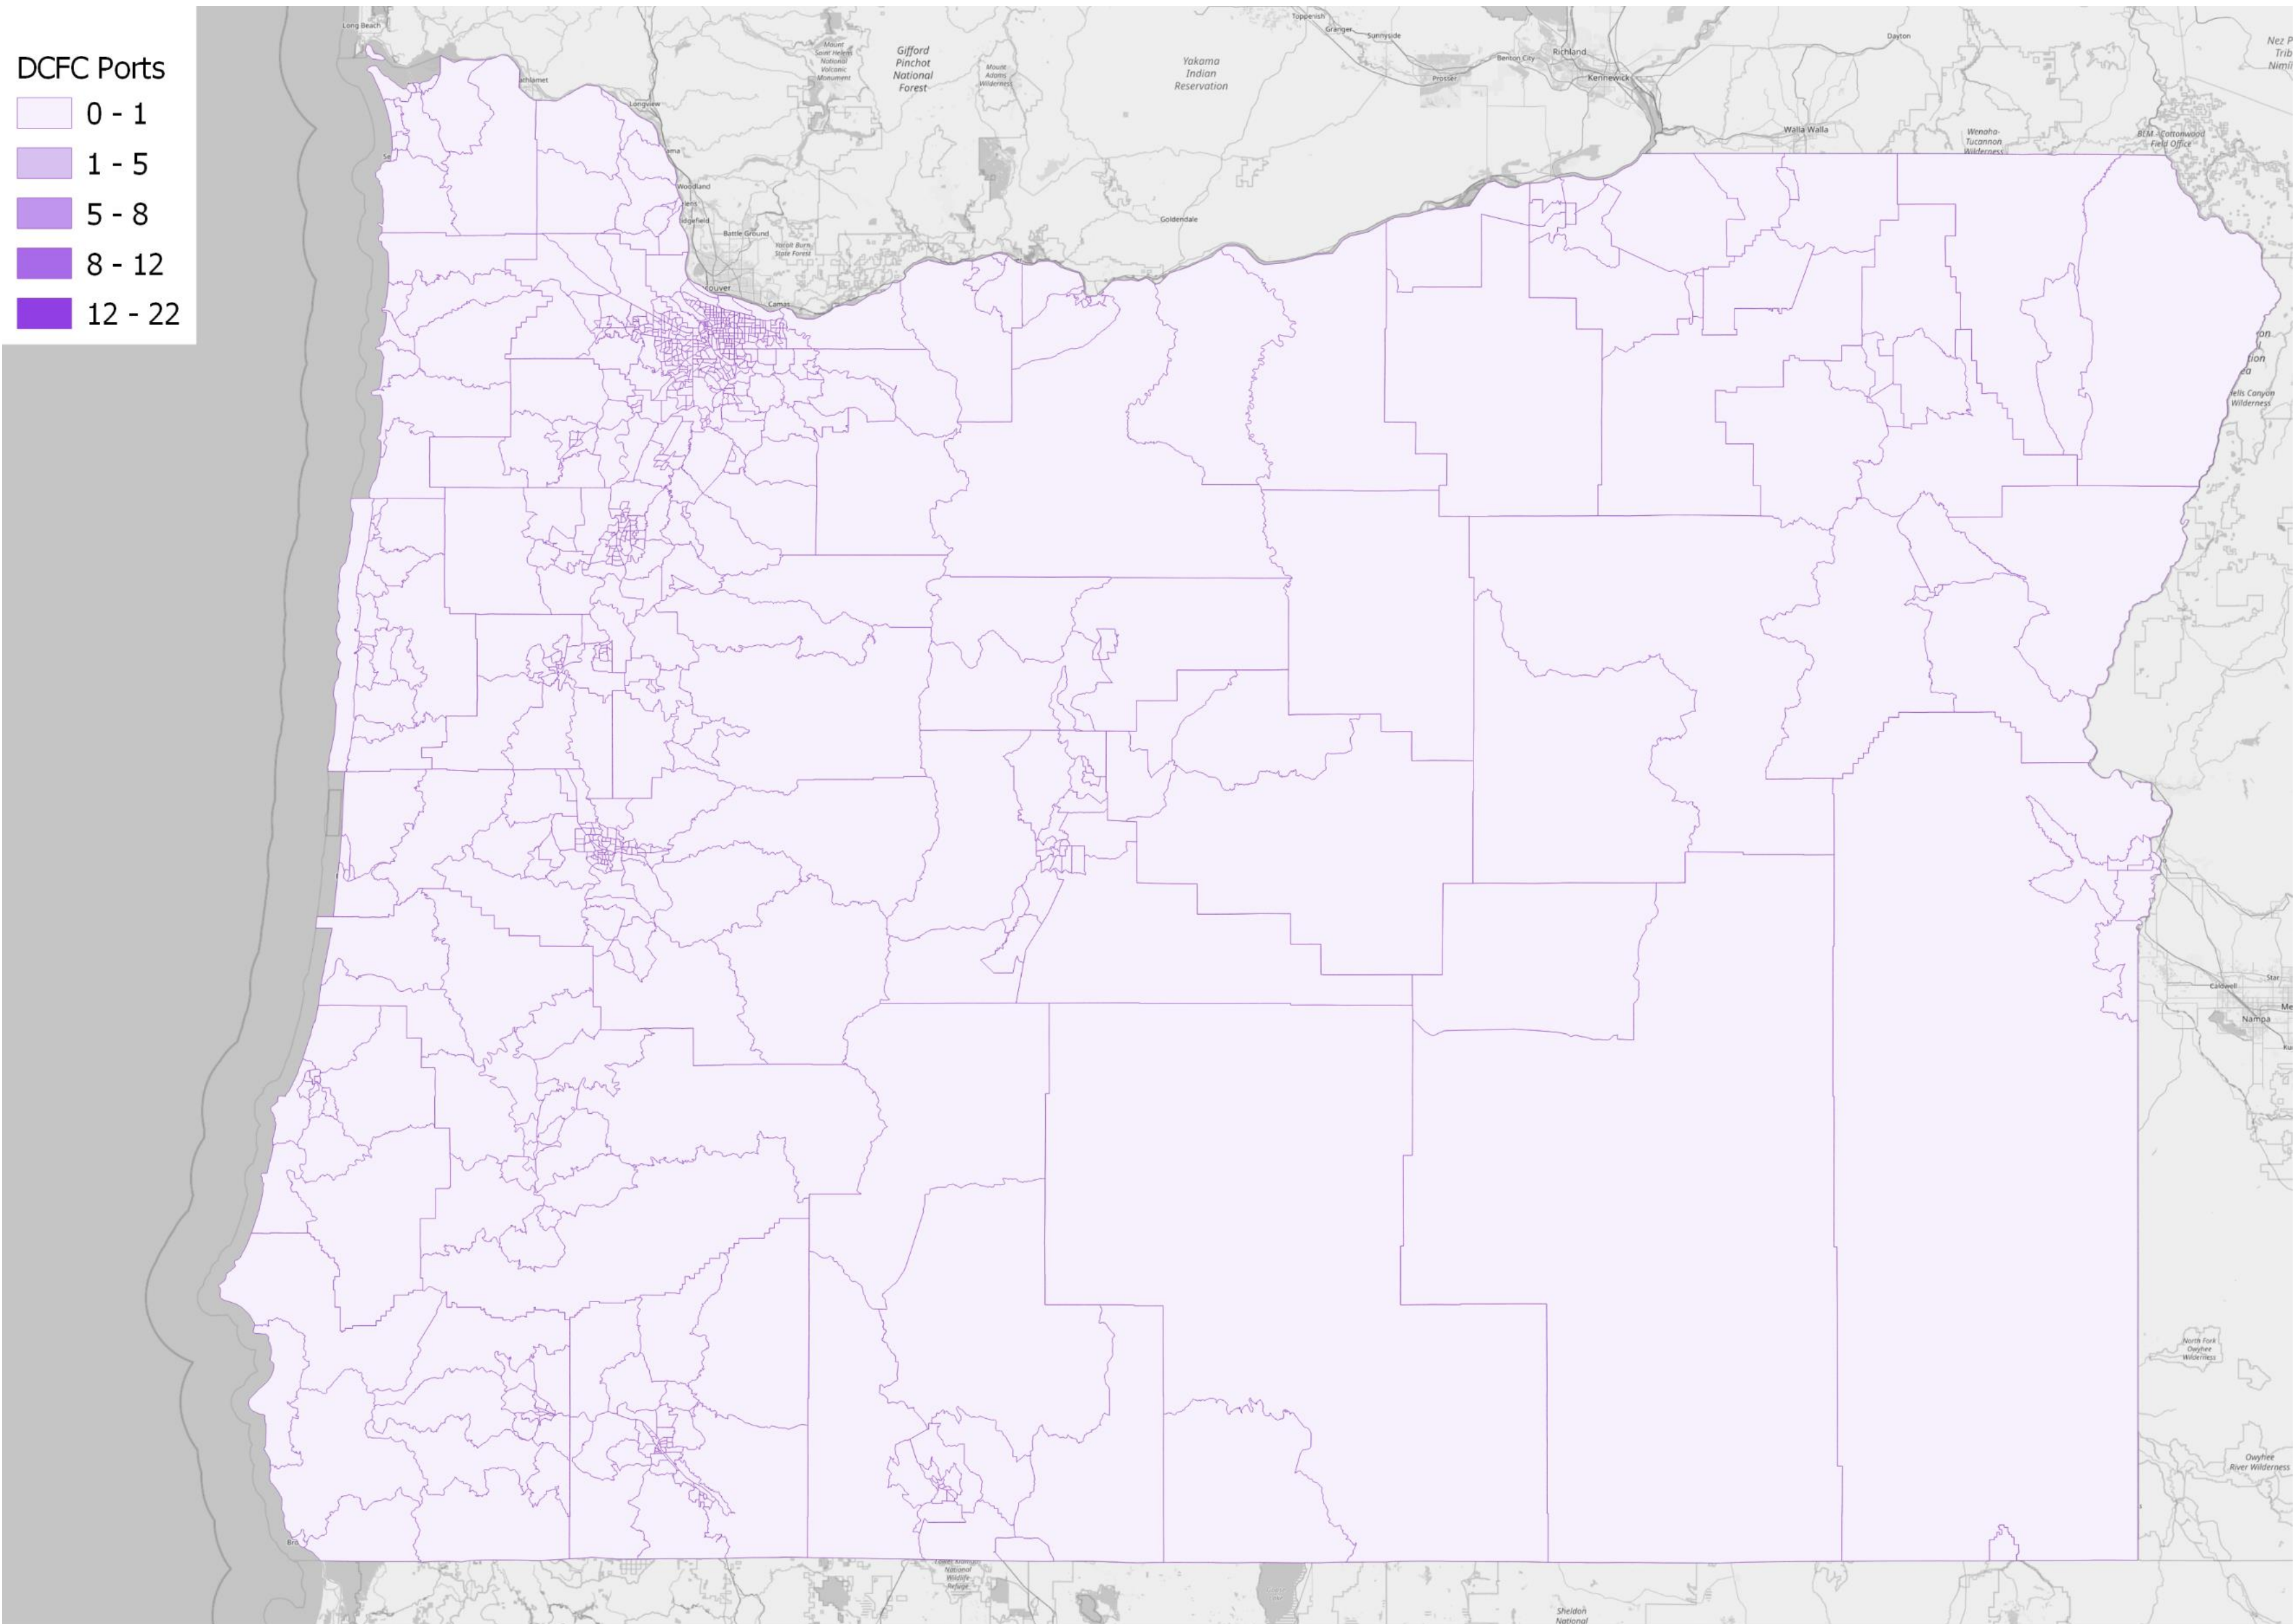

What “additional” means: heat maps labeled “additional” for this use case are the additional DC fast chargers required when factoring the needs of disadvantaged communities into the Urban/Rural model heat maps.

In other words, each Urban/Rural heat map was modeled without factoring in the needs of disadvantaged communities. The separate “additional” maps represent the additional number of chargers that Urban and Rural areas would need to accommodate the needs of disadvantaged communities.
